

A. ASSESSMENT RECAP

You are required to examine a case study organization.

You will write a report on its societal and environmental obligations, examining its sustainability efforts, analyzing the internal and external issues/problems/challenges it may face in the medium to long term (that is, the next 5 to 10 years) if it continues what it does today, and provide recommendations that can help the company to avoid those potential issues.

Structure:

Introduction

Context of the case study

Analysis

Recommendations

Conclusion

B. KEYWORDS EXPLANATION

1. **Societal and environmental obligations** refer to the responsibilities that individuals, organizations, and governments have towards society and the environment.
2. **ESG - Environmental, Social, and Governance**; the 3 central factors in measuring sustainability and ethics of a business.
3. **UN Sustainable Development Goals** - 17 goals set by the United Nations in 2015 addressing global economic, social, and environmental aims.
4. **Life Cycle Assessment** - Evaluates the environmental impact of a product over its entire life cycle from raw materials to disposal.
